

7-in-1 Remote Control Adaptor for iPad, iPhone and iPod

Introducing iControl.1, a micro remote control adaptor that you can plug your existing earphones straight into, letting you talk hands-free. You can also manage your track selections on your iPod, iPad and iPhone at the touch of a button.

Thanks to a universal 3.5mm audio input, you can connect your existing earphones to iControl.1, allowing you to adjust the volume, pause, skip, fast-forward and play tracks without removing your iPhone from your pocket. Furthermore, iControl.1 supports VoiceOver™ for compatible Apple devices, enabling you to hear the names of songs and artists as well as playlist information without having to look at the screen.

iControl.1 is perfectly suited to hands-free phone calls when you are on the go. Featuring a sensitive microphone that is designed for phone calls and voice recording, iControl.1 pauses your music and resumes the track once the call has ended. This device also boasts a shirt clip to ensure that any long headphone wires won't get in your way.
